

Epic 1: New Customer Loan Acquisition

Feature 1.1: Informative and Trustworthy Homepage

- **Story H-01: As a potential borrower**, I want to see a clear, compelling headline with the loan range and key benefits so that I can immediately understand the offer.
 - **Story H-02: As a cautious user**, I want to use an interactive loan calculator to see the principal, interest, fees, and total amount due for different loan amounts so that I can make an informed borrowing decision.
 - **Story H-03: As a ready-to-apply user**, I want a prominent "Apply Now" button on the homepage so that I can start my application process immediately.
 - **Story H-04: As a security-conscious user**, I want to see trust signals (NCR Registered, POPIA Compliant) on the homepage so that I feel confident and safe using this service.
-

Epic 2: Streamlined Loan Application Journey

Feature 2.1: Personal & Employment Details Capture

- **Story A-01: As an applicant**, I want to enter my basic personal details (SA ID, Name, Contact info) in a simple first step so that I can quickly begin the process.
- **Story A-02: As a privacy-conscious user**, I want to explicitly give my consent for POPIA and credit checks (Experian) via a checkbox so that I understand and agree to how my data will be used.
- **Story A-03: As an applicant**, I want to provide my employment and income details, including my payday cycle and net salary, so that the system can accurately assess my affordability.

Feature 2.2: Secure Banking & Document Upload

- **Story A-04: As an applicant**, I want to provide my banking details for payout and debit orders so that the loan can be deposited and repayments can be collected seamlessly.
- **Story A-05: As an applicant**, I want to upload my required documents (ID, Bank Statements, Proof of Residence) easily, with clear instructions on accepted formats, so that I can complete my application.
- **Story A-06: As a tech-savvy applicant**, I want the option to securely link my bank account via an API (like Stitch) instead of manually uploading statements so that I can verify my income instantly and conveniently.

- **Story A-07: As an applicant**, I want the system to tell me which documents are mandatory and which are optional so that I don't get stuck on unnecessary steps.

Feature 2.3: Instant Decision & Agreement

- **Story A-08: As an applicant**, I want to receive an instant decision on my loan application after submitting all my information so that I don't have to wait in uncertainty.
 - **Story A-09: As an approved applicant**, I want to see a clear celebration message with the approved loan amount and the next steps to finalize the loan.
 - **Story A-10: As a declined applicant**, I want to receive a transparent and polite decline message, referencing the reason (e.g., affordability rules), so that I understand the outcome, even if it's negative.
 - **Story A-11: As an approved applicant**, I want to review and sign the NCR-compliant digital loan agreement securely via OTP or e-signature so that I can formally accept the loan terms.
 - **Story A-12: As an approved borrower**, I want to receive clear confirmation that funds will be sent via EFT within 24 hours so that I know when to expect the money.
-

Epic 3: Borrower Self-Service & Management

Feature 3.1: Loan Overview & Status

- **Story B-01: As a borrower**, I want to log in to a dashboard and see the current status of my loan (Pending, Approved, Declined, Paid Out) at a glance.
- **Story B-02: As a borrower**, I want to see all my loan details in one place: amount borrowed, repayment due date(s), interest, fees, and the total amount to be repaid.

Feature 3.2: Repayment Management

- **Story B-03: As a borrower**, I want a "Pay Now" button to make a manual repayment using my preferred method in case my debit order fails or I want to pay early.
- **Story B-04: As a financially prudent borrower**, I want the option to settle my loan early without any penalties so that I can save on interest and improve my financial health.

Feature 3.3: Document Access & Support

- **Story B-05: As a borrower**, I want to view and download my loan agreement, repayment statements, and settlement letters at any time for my personal records or proof of payment.
 - **Story B-06: As a borrower**, I want to be able to upload additional or requested documents (e.g., a new bank statement) after my initial application.
 - **Story B-07: As a borrower with a question**, I want easy access to a WhatsApp chat and an FAQ section directly from my dashboard so that I can get help quickly without calling.
-

Epic 4: Internal Admin & Operations

Feature 4.1: Application Processing & Verification

- **Story AD-01: As a loan officer**, I want to see a list of all applications with their current status so that I can manage the workflow efficiently.
- **Story AD-02: As a verifications officer**, I want to view an applicant's full details, Experian affordability report, and all uploaded documents on a single screen so that I can make a verification decision.
- **Story AD-03: As a verifications officer**, I want to be able to approve or reject uploaded documents (flagging them as blurry, fake, or incorrect) so that we maintain the integrity of our checks.
- **Story AD-04: As a loan officer**, I want the system to provide a recommendation (Approve/Decline) but also allow me to manually override the decision with a reason so that we can handle edge cases.

Feature 4.2: Collections & Compliance

- **Story AD-05: As a collections officer**, I want to see a dashboard of upcoming and failed debit orders so that I can manage collections proactively.
 - **Story AD-06: As a collections officer**, I want to trigger automated arrears reminders via SMS or WhatsApp based on pre-defined rules so that we can efficiently contact delinquent borrowers.
 - **Story AD-07: As a compliance manager**, I want the system to automatically log and store a complete audit trail for every loan, including the 3 months of bank statements and the Experian report, so that we are always ready for an NCR audit.
-
